

**BATTERIES**

PremierPro™ Alkaline Batteries provide reliable power sources for numerous items throughout your hospital setting. The PremierPro™ battery offering ensures quality energy brought to items such as monitors, pumps, remote controls, communication devices and even safety supplies such as flashlights or smoke detectors. Alkaline Batteries feature a green ribbon for increased visibility if dropped or left on a countertop. All batteries are securely wrapped in clear plastic with perforations for easy removal from the packaging. PremierPro™ batteries meet or exceed the performance standards set by the national brands.

- Mercury and lead free
- 5 year shelf life
- Operating temperature of 0° to 120° F
- Alkaline batteries are securely wrapped in clear plastic shrink wrap with perforations
- 9V Battery composed of a metal jacket to help protect it from temperature changes
- 4 different styles of Button Cell Lithium Batteries
