

MEMBER DRIVEN VALUE + QUALITY

**Safety Lancets**

PremierPro™ offers three categories of sterile lancets in a variety of needle specifications to safely collect blood samples. Pressure Activated, Button Activated, and Heel Lancets are all available in various needle gauges for fingertip or heel sampling. Pressure Activated lancets are contact activated when placed against the patient’s skin. Button Activated lancets have a side trigger firing action that provides extra patient comfort. Heel Lancets are suitable for Newborns and Premies. PremierPro™ lancets are fully shielded before and after use for added protection to the health care professional as well as the patient.

- High, medium, or low flow lancets available for all types of capillary blood sampling
- Preloaded design with tri-bevel needle or bi-level blade for high speed penetration
- Needle retracts automatically after use to reduce risk of cross contamination.
- Color coding helps health care professionals choose the correct lancet and keep lancets organized.
- 17G blade option available in button activated lancets
- All lancets are sterile and disposable for single use
- Not made with natural rubber latex
