

FACE PROTECTION PORTFOLIO

As a direct sourcing alternative, S2S Global benefits Premier members by removing costs from the supply chain and by providing a greater impact on product flow, pricing and quality under the PremierPro® brand.

S2S Global offers a comprehensive selection of Face Protection products including Surgical and Isolation Masks, Procedure Masks, MRI Safe Masks, Eye Shields, Face Shields and Safety Glasses to meet the many needs of healthcare facilities. The PremierPro line of Face Protection is designed specifically to deliver the protection you need, with the comfort you deserve.

Choosing the right face protection is a simple process. First consider the use and then what features will be best for your staff. Please consult the following pages for details specific to each product line.

- **Surgical and Isolation Masks**
- **MRI Safe Earloop Masks**
- **Pediatric Procedure Masks**
- **Cone-Style Procedure Masks**
- **Face Mask Box Holders**
- **Protective Eye Wear**

ASTM STANDARDS

The American Society for Testing and Materials (ASTM) is an international standards organization that sets the guidelines for face mask protection in North America known as ASTM F2100. These are the only medical face mask standards recognized by the FDA, so by meeting these standards with all of our PremierPro™ Surgical and Isolation Masks, you can be sure your protection is our top priority.

ASTM masks are offered in levels 1, 2 and 3, with 3 being the highest level of protection. The current standards for face masks set out the following five protection criteria a mask must meet in order to be recognized as a 'rated' mask.

Fluid Resistance - resistance of penetration to synthetic blood at one of three levels of protection (80 mm Hg, 120 mm Hg, 160 mm Hg).

Bacterial Filtration Efficiency (BFE) - filtration ability when challenged with an aerosol that contains bacteria 3.0 microns in size

Particle Filtration Efficiency (PFE) - filtration ability when challenged with sub-micron particulate matter 0.1 microns in size, representative of viruses

Delta P - air flow from one side of the mask to the other to assess breathability

Flammability - masks must meet Class 1 flame resistance requirements

ASTM F2100: LEVEL 1 BARRIER
80 mm Hg FLUID RESISTANCE

IDEAL FOR EVERYDAY USE OR WHERE
THERE IS LOW RISK OF EXPOSURE TO
SPRAY OR SPLASH.

ASTM F2100: LEVEL 2 BARRIER
120 mm Hg FLUID RESISTANCE

SUITABLE FOR PROCEDURES WITH A
MODERATE RISK OF EXPOSURE TO
SPRAY OR SPLASH.

ASTM F2100: LEVEL 3 BARRIER
160 mm Hg FLUID RESISTANCE

HIGHEST PROTECTION AVAILABLE. BEST
FOR USE WHEN RISK OF EXPOSURE TO
SPRAY OR SPLASH IS HIGH OR UNKNOWN.

ASTM F2100 TESTING

TEST & STANDARD	ASTM 1	ASTM 2	ASTM 3
Bacterial Filtration Efficiency (BFE) at 3.0 micron (ASTM F2101)	≥ 95%	≥ 98%	≥ 98%
Particulate Filtration Efficiency (PFE) at 0.1 micron (ASTM F2299)	≥ 95%	≥ 98%	≥ 98%
Synthetic Blood Penetration Resistance, mmHg (ASTM 1862)	80	120	160
Differential Pressure (ΔP), mm H ₂ O/cm ² (MIL-M-36954C)	< 5.0	< 6.0	< 6.0
Flammability Rating (16 CFR part 1610)	Class 1		

All PremierPro™ Surgical and Isolation Masks are designed to be single use only and should be safely removed and discarded according to hospital policies after every procedure or patient visit. All masks feature ultrasonically welded seams for added protection and are not made with natural rubber latex.

SURGICAL AND ISOLATION MASKS - ASTM LEVEL 1

2453 - Earloop Procedure Mask, Blue, ASTM Level 1

- Ideal for average fluid exposure procedures
- Extra soft ear loops with optimum stretch provide a comfortable fit
- Double reinforced nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2454 - Earloop Procedure Mask, Yellow, ASTM Level 1

- Ideal for average fluid exposure procedures
- Extra soft ear loops with optimum stretch provide a comfortable fit
- Double reinforced nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2460 - Surgical Tie Mask, Light Blue, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2461 - Surgical Tie Mask, Horizontal Ties, Gray, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash, particularly for those who prefer a large mask coverage area
- Extra soft, horizontally-oriented, long ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2462 - Surgical Tie Mask, Soft Bill, Light Blue, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash, and for those who prefer a mask providing an open feel
- Pocketed opening provides added structure, keeping material away from the mouth and lips
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2463 - Surgical Tie Mask, Large Soft Bill, Green, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash, and for those who prefer a mask providing an exceptionally open feel
- Large pocketed opening provides added structure, keeping material away from the mouth
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

SURGICAL AND ISOLATION MASKS - ASTM LEVEL 1

2464 - Surgical Tie Mask with Anti-Fog Foam, Denim Blue, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash and the anti-fog foam provides an effective guard against the fogging of eyewear and shields
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2465 - Surgical Tie Mask with Anti-Fog Film, Green, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash and the anti-fog film provides a gentle and effective guard against the fogging of eyewear and shields
- Thin film strips on the inner and outer layers trap moisture generated during use allowing the inner strip to 'hug' the contours of the face, and preventing the fogging of eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2466 - Surgical Tie Mask with Anti-Fog Tape, Green, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash and the anti-fog adhesive tape provides our most effective guard against the fogging of eyewear and shields
- Adhesive mesh strip acts as a barrier by creating a 'seal,' contouring the face and preventing the fogging of eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2470 - Surgical Tie Mask, Soft Lining, White, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash, particularly for those with sensitive skin
- Super smooth, soft, and dye-free materials make this mask perfect for clinicians with sensitive skin, or those looking for maximum comfort
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2472 - Surgical Tie Mask with Anti-Fog Foam, Soft Lining, White, ASTM Level 1

- Ideal for use in the O.R. when there is a low risk of exposure to spray or splash, particularly for those with sensitive skin
- Super smooth, soft, and dye-free materials make this mask perfect for clinicians with sensitive skin, or those looking for maximum comfort
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

SURGICAL AND ISOLATION MASKS - ASTM LEVEL 3

2450 - Earloop Procedure Mask with Anti-Fog Foam, Sea Blue, ASTM Level 3

- Ideal for line changes and wound care procedures, offers critical protection during flu season
- Barrier protects the wearer from pathogens generated by talking, coughing, and sneezing
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Extra soft ear loops with optimum stretch provide a comfortable fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 10 bxs/cs

2451 - Earloop Procedure Mask with Anti-Fog Foam & Visor, Sea Blue, ASTM Level 3

- Ideal for line changes and wound care procedures, offers critical protection during flu season
- Barrier protects the wearer from pathogens generated by talking, coughing, and sneezing and provides convenient, “all-in-one” protection with the integrated anti-fog visor
- Visor has periphery wings to protect users from both head-on and broadside fluid exposure
- Heavy gauge nose piece supports the visor for minimal movement during use
- Extra soft ear loops with optimum stretch provide a comfortable fit

25/bx; 4 bxs/cs

2467 - Surgical Tie Mask with Anti-Fog Foam, Sea Blue, ASTM Level 3

- Ideal for use in the O.R. when there is a high risk of exposure to spray or splash and the anti-fog foam provides an effective guard against the fogging of eyewear and shields
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2471 - Surgical Tie Mask, Large Soft Bill, Soft Lining, White, ASTM Level 3

- Ideal for use in the O.R. when there is a high risk of exposure to spray or splash, particularly for those with sensitive skin who prefer a mask providing an exceptionally open feel
- Super smooth, soft, and dye-free materials make this mask perfect for clinicians with sensitive skin, or those looking for maximum comfort
- Large pocketed opening provides added structure, keeping material away from the mouth
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

2480 - Surgical Tie Mask with Anti-Fog Foam & Visor, Sea Blue, ASTM Level 3

- Ideal for use in the O.R. when there is a high risk of exposure to spray or splash and provides convenient, “all-in-one” protection with the integrated anti-fog visor
- Visor has periphery wings to protect users from both head-on and broadside fluid exposure
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Heavy gauge nose piece supports the visor for minimal movement during use
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit

25/bx; 4 bxs/cs

2481 - Surgical Tie Mask with Anti-Fog Foam, Anti-Fog & Anti-Glare Visor, Sea Blue, ASTM Level 3

- Ideal for use in the O.R. when there is a high risk of exposure to spray or splash and provides convenient, “all-in-one” protection with the integrated anti-glare / anti-fog visor
- Visor has periphery wings to protect users from both head-on and broadside fluid exposure
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Heavy gauge nose piece supports the visor for minimal movement during use
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit

25/bx; 4 bxs/cs

2492 - Surgical Tie Laser Mask, Gray, ASTM Level 3

- Ideal for use in the O.R. when there is a high risk of exposure to spray or splash and the anti-fog foam provides an effective guard against the fogging of eyewear and shields
- May be used for laser procedures in which surgical smoke is generated
- Soft anti-fog foam helps prevent fogging of glasses and other eyewear
- Extra soft, long and flexible ties provide ultimate comfort and a tailored fit
- Premium aluminum nosepiece provides an excellent fit

50/bx; 6 bxs/cs

MRI SAFE EARLOOP MASKS

- Safe for use during MRI procedures
- Complies with FDA safety recommendations
- ASTM Rated Level 2 for moderate fluid exposure
- Soft breathable material; plastic nose bar
- 16 CFR Part 1610: Class I Flammability
- CA Prop 65 compliant
- Not made with natural rubber latex

2497

50/bx; 6 bxs/cs

CONE-STYLE PROCEDURE MASKS

- Sturdy nose piece and round edges allow for a secure fit
- 16 CFR Part 1610: Class I Flammability
- Not made with natural rubber latex

2490

50/bx; 6 bxs/cs

FACE MASK BOX HOLDERS

- Clear acrylic face mask box dispenser
- Easily identify face mask size and type
- Designed for wall mounting; available in three single box sizes (*see packaging index page 9 for details*)
- Not made with natural rubber latex

Small **2402**
Large **2404**
Tall **2407**

1/bx; 10 bxs/cs

PROTECTIVE EYE WEAR

Eye Shields

- Frames available in multiple colors
- Lightweight and disposable
- Lenses are anti-fog on both sides
- Replacement frames and lenses sold separately in bulk quantities
- Not made with natural rubber latex

Assembled Shields **2493**
Replacement Frames (100/cs) **2494**
Replacement Lenses (250/cs) **2495**

10/bg; 5 bgs/cs

Full Face Shields

- Lightweight and disposable
- Flexible foam front headband and secure back elastic band
- Not made with natural rubber latex

2496

24/bx; 4 bxs/cs

Safety Glasses

- Encase and protect the area surrounding the eyes
- Comfortable fit featuring side vents
- UV protective
- Universal size
- Not made with natural rubber latex

2489

12/bx; 25 bxs/cs

FACE PROTECTION PACKAGING INDEX

SURGICAL AND ISOLATION MASKS

DESCRIPTION	COLOR	REORDER NUMBER	PACKAGING
ASTM Level 1			
Earloop Procedure Mask	Blue	2453	50/bx; 6 bxs/cs
Earloop Procedure Mask	Yellow	2454	50/bx; 6 bxs/cs
